

## World cup SLALOMANIA 2011

Siamo veramente emozionati nell'annunciare i risultati della slalomania world cup.

We are most excited of the results from the Slalomania World Cup competition.

Si tratta di una nuova competizione concentrata sulla velocità-spettacolo che ha avuto un grande seguito mediatico e probabilmente in futuro diventerà sempre più importante nella diffusione della conoscenza del paramotore per il grande pubblico.

This is a new type of competition that concentrates on the speed/show aspect that paramotor flying can provide. This has attracted great interest from the media and with the media involvement will provide much better exposure of our activity to the general public.

Sinceramente non speravamo in risultati importanti perchè per ottenere alte velocità e rapidi manovre serve molta potenza, caratteristica poco ricercata nelle nostre macchine particolarmente leggere. We were not expecting important results from our Miniplane pilots because high speed and fast maneuvers requires a lot of thrust. This performance is more challenging to obtain from our machines that are mostly designed for light weight and quiet, fuel efficient running.

Invece l'abilità dei nostri piloti, il miglioramento delle prestazioni delle eliche, delle vele e le qualità dei nostri Miniplane ci hanno consentito di gioire per questi nuovi sorprendenti risultati.

However with the outstanding ability of the pilots flying our equipment, and the recent gains we have made in propeller performance as well as glider performance from our partners, our Miniplanes have been able to enjoy the surprising results.

Un Grazie sincero ai piloti che, sappiamo, si sono duramente allenati per questa specialità.

Our sincere appreciation to all pilots that as we know have been training very hard in this demanding event.

Grazie ad Alex, con Miniplane e motore Polini Thor con la collaborazione di Polini.

A thank you to Alex, with Miniplane Polini Thor model and the collaboration with Polini.

Grazie a Grzegorz che ha personalmente modificato un nostro Miniplane secondo le sue esigenze.

A thank you to Grzegorz that has made some personal modifications to his Miniplane to better fit his particular requirements.

Grazie a Kamil e Andrezej con macchine perfettamente di serie, pur svantaggiati dal fatto di non essere sicuramente tra i piloti più leggeri, hanno contribuito al risultato della squadra Polacca che così ha raggiunto il miglior risultato nella loro storia di competizioni internazionali.

Thank you to Kamil and Andrezej, flying standard off the shelf Miniplanes, and also with them being pilots that are not the lightest in weight, were able to contribute to the positive results of the Polish team (they reached the best results ever for their country in this event).

Ricordiamo ancora che questi risultati sono stati raggiunti anche grazie a nuove eliche particolarmente adatte alle alte velocità e al miglioramento delle prestazioni delle vele, Dudek Hadron nel caso della squadra polacca.

We feel the most contributing factors in these results were obtained with the new performance levels using our new propeller profiles for high speed flying and the better performance of the gliders, Dudek Hadron in particular for the Polish team.

Diego, Competition results for British Open: <http://ppgcomps.co.uk/assets/files/2011%20Open%20-%20Overall%20Results%20Official.pdf>

and for British League:

<http://ppgcomps.co.uk/assets/files/League-Overall%202011.pdf>

There is a good blog from paramotormag here with pictures and photos:

<http://www.paramotormag.com/category/uk-ppg-open-2011/>

For the French Open, there is a blog with videos:

[www.ffplum.fr](http://www.ffplum.fr)

but no official results anywhere.

Laura was top lady in both events. She did very well in the eco distance task in the British Open:
